FAA NATIONAL SUPPORT SERVICES

J. M. Waller Associates, Inc. (JMWA®) provides cost-effective and responsive environmental, engineering, logistics, technical, management and professional consulting services to federal and civil agencies including the Federal Aviation Administration (FAA). Working with the FAA since 2002, JMWA stands ready to provide both on-site technical support and project related services. JMWA specifically supports the FAA's Environmental Compliance, Hazardous Materials Management, Safe Drinking Water Program, Environmental Cleanup Program and Fuel Storage Tank Program. JMWA also provides comprehensive facility management support including engineering analysis and design and construction phase services including turnkey construction, fire protection engineering, construction management and resident engineering.

JMWA is a Service Disabled Veteran Owned Small Business (SDVOSB). With more than 17 years experience, JMWA's high-tech science and engineering professionals exceed the needs of all federal agencies, states, municipalities and commercial clients.

JMWA's more than 50 program and project offices have served more than 2200 national and international projects with cost-effective and responsive management, consulting and professional outsourcing services.

We manage our clients vision for the future through our depth and breadth of services, global experience and long-term relationships built along the way. JMWA provides worldwide best management practices to solve client challenges in the following general areas:

- » **Environmental, Safety & Occupational Health Management**
- » **Facility Planning, Design & Construction Management**
- » **Logistics & Sustaining Engineering**
