LOGISTICS SOLUTIONS

Supply Chain Management

J. M. Waller offers advice and support concerning every aspect of the supply chain from design to implementation and sustainment. We will work with clients on beginning-to-end scenarios for supply chain modeling, analysis of potential problem areas in the distribution chain, distribution management, and provide recommendations for improvement and process reengineering.

Warehouse Management

We offer our clients the capability to receive, store, and issue/ship assets to global locations. We provide a wide range of trained professionals to assist with all your warehousing needs. Our warehouse management provides an effective, reliable, flexible and secure capability that supports your business needs. We provide recommendations for efficiencies in operations, day-to-day labor and an increased capability.

Asset Management

J. M. Waller offers a full range of asset management services organized to support existing business operations, engineering and maintenance activities. We provide total asset management from property acquisition through planned disposal. J. M. Waller asset management professionals provide these services with in-depth experience managing federal facility portfolios. Our professionals have extensive experience in worldwide facilities operation, maintenance and management practices that optimize asset management programs, increase facility reliability and extend useful life while reducing life cycle costs.

Supply Chain, Warehouse and Asset Management Services include:

- Supply chain management support
- Modeling, distribution management, item management
- Bill of material support
- Warehousing and inventory support
- Maintenance planning
- Supply support
- Packaging, handling, storage and transportation
- Development of cost-effective systems and approaches for meeting logistics readiness requirements.

LOGISTICS SOLUTIONS

Transportation Services

J. M. Waller offers transportation and Personnel Property Movement services with proven performance. Our employees are certified professionals experienced in planning, consulting and supporting client acquisition needs both on and off site. Our team performs administrative, shipment security, counseling, and the necessary coordination required for the inbound/outbound shipment and storage of personal property, household goods and passenger transportation. Our personnel assigned to the Personal Property Shipping Office within our Transportation Department have a complete understanding of associated Department of Defense regulations applicable to these functions.

Materials Management

J. M. Waller manages client property portfolios including expertise to assist with the management of all types of property whether it is property book, warehouse or repair parts. We provide personnel for analysis, on-site assistance, instruction, recommendations and corrective action support. J. M. Waller provides our clients with expertise to assist with the management of materials including on-site assistance, instruction, corrective action support, material handling, production/quality control, property book and assistance teams.

LOGISTICS SOLUTIONS

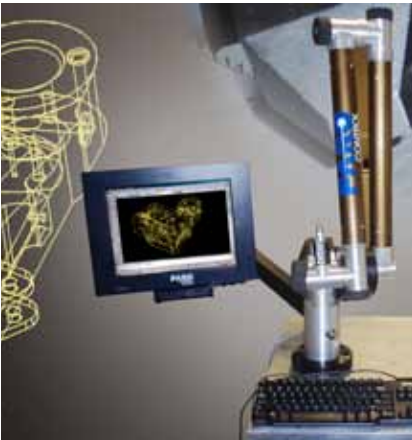

Advanced Planning, Scheduling, Analysis and Optimization

J. M. Waller provides our clients with timely service to help stay ahead of the competition. We provide support assistance to our customers with planning, research, follow-up, timeline development, analytic and logic analysis, while providing solutions to help optimize capabilities.

Maintenance Services

We offer clients a variety of options while complementing or replacing current staffing including personnel for all levels of maintenance including Mechanics, Production Control, Parts Clerks and Quality Control Representatives.

Logistics Engineering Support

J. M. Waller offers clients a variety of engineering support to satisfy logistics options. When your supply chain cannot provide a critical part on time, a part is obsolete with no current manufacturer available or you require analysis to assure quality standards are met, J. M. Waller's logistics engineering team can provide engineering, quality assurance or verification to ensure parts meet drawing specifications.

Acquisition Support Services

J. M. Waller offers certified professionals in the contracting and acquisition areas who will provide on-site and off-site services on both a consulting and long-term basis with proven performance.

For our successful efforts, J. M. Waller has received numerous national awards, including:

- #38 on ZweigWhite's 2011 Hot Firm List. Previous ranking #57 in 2010
