ENERGY MANAGEMENT SERVICES

Energy usage, type and management have quickly moved to the forefront of the agenda for many organizations. Whether looking for ways to utilize less energy overall, cut energy waste and costs, develop renewable energy sources or enhance your company's green or LEED status, Energy Management solutions from J. M. Waller Associates, Inc. (JMWA[®]) can help you achieve your energy goals.

JMWA provides a broad range of Energy Management services focused on improving your facilities' energy efficiency, eliminating waste and enhancing quality of life while meeting your organization's mission requirements. We provide specialized expertise and qualified staff in all phases of administration, planning, programming, budgeting, operations and maintenance activities that affect the supply, reliability and consumption of facility energy.

Cost-Effective and Efficient Energy Management Services Support

Our Energy Management specialists will team with your project planners, facility managers and senior leadership to tailor a plan specific to reducing building energy cost, increasing energy efficiency and developing renewable energy projects. We will ensure your questions are answered thoroughly and appropriate steps taken to complete your energy projects in a timely manner, within budget and with the highest level of professionalism.

JMWA has specialized experience in multiple EM disciplines and services including:

- » Construction management services for green and LEED buildings
- » Design/Build renewable energy projects
- » Economic data and budget analysis
- » Energy audits/reviews
- » Energy benchmark analysis
- » Energy efficiency upgrades on existing facilities
- » Energy Management Control Systems and Software Management
- » Energy management program planning
- » Engineering data analysis
