GEOGRAPHIC INFORMATION SYSTEMS (GIS)

Providing GIS/GPS Expertise to Support Decision Makers

The effective management of an organization with complex, dynamic and wide-ranging objectives requires comprehensive, up-to-date information and analytical resources to support decision making at all levels of operation and command.

J. M. Waller Associates, Inc. (JMWA®) offers Geographic Information System (GIS) consultants who provide cost-effective solutions and innovative techniques to solve complex challenges and meet your needs.

Whether you are interested in starting, upgrading or refining your GIS capabilities or need assessments for complex decision making, we offer a team of specialists who develop innovative solutions for today's executive decision makers.

JMWA's GIS specialists are industry experts whose capabilities include customizing solutions to meet your data tracking, reporting and visualization needs. Our team collects, converts, and integrates data into existing or custom designed geodatabases and provides application training and support for long-term success. JMWA utilizes the latest Geographic Positioning Systems (GPS) technology to generate accurate spatial data enhancing decision making and analysis.

JMWA's consultants have expert knowledge of GIS/GPS standards such as:

- » Spatial Data Standard for Facilities, Infrastructure, and Environment (SDSFIE)
- » Federal Geographic Data Committee Metadata Standards (FGDC)
- » Air Force GeoBase Program Standards
- » GPS Standard Positioning Service Performance Standard

JMWA offers spatial analysis including:

- » Needs Assessments
- » Strategic Planning
- » Data Architecture Development and Deployment
- » System Architecture Development and Deployment
- » Facilities, Infrastructure and Real Property Planning and Utilization

For more information about JMWA's GIS services, or any of our other Environmental, Facilities or Logistics lines of business, visit us at www.jmwaller.com or contact one of our offices below.
